the arc of spirituality invites readers on a journey through western history a journey that begins with the pioneering concepts of ancient israelites who understood spirituality communally and covenantally continuing biblically with wisdom and apocalyptic conceptions the arc of spirituality examines western christian spirituality as it developed historically through twelve phases culminating in the modern period with ethical ecumenical pluralist and ecological expressions and most recently with postmodern secular alternatives having described his own journey in previous volumes in this culminating book vande kappelle builds on earlier writings such as response to the other the second journey and the church alumni association to tell the story of the western world s unfolding love affair with god the narrative while continuously inspiring necessarily takes us through dark alleys and down deep rabbit holes in spirituality s never ending quest to know and experience the transcendence around us and within the goal of spirituality is always god and while god makes the journey interesting it is never easy for there are no clear steps to follow or learn while spirituality is more caught than taught at some point we discover it is more about unlearning than learning enriched more by subtraction than by addition the arc of spirituality is useful for individual or group study each chapter concludes with questions for discussion or reflection

this theory recognizes the evolution of the soul as a process that is quite continuous in itself though carried out partly through the instrumentality of a great series of dissociated forms putting aside for the moment of profound metaphysics of the theory which trace the principle of life from the original first cause of the cosmos we find the soul as an entity emerging from the animal kingdom and passing into the earliest human forms without being at that time ripe for the higher intellectual life with which the present state of humanity renders us familiar but through successive incarnations in forms whose physical improvement under the darwinian law is constantly fitting them to be its habitation at each return to objective life it gradually gathers that enormous range of experience which is

summed up in its higher development in the intervals between its physical incarnations it prolongs and works out and finally exhausts or transmutes into so much abstract development the personal experiences of each life this is the clue to the true explanation of that apparent difficulty which besets the cruder form of the theory of reincarnation which independent speculation has sometimes thrown out each man is unconscious of having led previous lives therefore he contends that subsequent lives can afford him no compensation for this one he overlooks the enormous importance of the intervening spiritual condition in which he by no means forgets the personal adventures and emotions he has just passed through and in the course of which he distills these into so much cosmic progress in the following pages the elucidation of this profoundly interesting mystery is attempted and it will be seen that the view of events now afforded us is not only a solution of the problems of life and death but of many very perplexing experiences on the borderland between those conditions or rather between physical and spiritual life which have engaged attention and speculation so widely of recent years in most civilized countries
